Environmental Health (EH) Research Scan: Aims and Scope

NCCEH’s EH Research Scan aims to expand awareness of topics in environmental health, in line with NCCEH’s vision to be the indispensable online resource for environmental health practitioners and policy-makers across Canada. “We focus on health risks associated with the physical environment and identify evidence-based interventions to mitigate those risks.” This review is not official or peer reviewed. It does not cover all research, news, and information, and NCCEH is not responsible for the accuracy of the content from media or databases. How to access the items? Click on the link related to each entry and it should take you to the item. Not all links are open access; some are abstract links where paid journal subscription is required.

Evaluating Active Transport Benefits and Costs. Guide to Valuing Walking and Cycling Improvements and Encouragement Programs

Todd Litman, Victoria Transport Policy Institute, 2018 Nov

“This analysis indicates that many active transport benefits tend to be overlooked or undervalued in conventional transport economic evaluation.”

Active Transportation Policy Case Studies Summary - Framing

World Health Organization, 2018 Nov

“The WHO Housing and health guidelines aim at informing housing policies and regulations at the national, regional and local level and are further relevant in the daily activities of implementing actors who are directly involved in the construction, maintenance and demolition of housing in ways that influence human health and safety.”

WHO Housing and Health Guidelines

World Health Organization, 2018 Nov

“The WHO Housing and health guidelines aim at informing housing policies and regulations at the national, regional and local level and are relevant in the daily activities of implementing actors involved in the construction, maintenance and demolition of housing in ways that influence human health and safety.”

Healthy Built Environment Forum

National Collaborating Centre for Environmental Health, 2018 Nov

This resource provides access to Healthy Built Environment in Canada discussions, Resources, and more…. Visit this new online NCCEH forum.

Healthy Built Environment Linkages Toolkit

BC Centre for Disease Control, 2018 May

“Making the links between design, planning and health.”
