

Resources From the NCCs for Environmental Health Professionals

The six National Collaborating Centres (NCCs) for Public Health work together to promote and improve the use of scientific research and other knowledge to strengthen public health practices, programs, and policies in Canada. A unique knowledge hub, the NCCs identify knowledge gaps, foster networks, and provide the public health system with an array of evidence-based resources, multi-media products, and knowledge translation services. The list below highlights NCC resources for environmental health professionals.

From the NCC for Environmental Health

- **Visit NCCEH.CA to access featured resources:**
 - Environmental risk factors for community-acquired MRSA
 - Green space and mental health: Pathways, impacts and gaps
 - Risk factors and surveillance systems for foodborne illness outbreaks in Canada
 - Understanding microbial indicators for drinking water assessment
- **Stay tuned for news about upcoming events, including the *Environmental Health Seminar Series* and the *NCCEH eJournal Club***
- **Browse the NCCEH website for these and more:**
 - Animals as sentinels for public health risks from oil and gas development
 - Fact sheet: Non-pharmaceutical measures to prevent the transmission of influenza
 - Review of field tests on bed bug control technologies
 - Effective indoor air interventions
 - Case study of a persistent landfill fire and community health impacts
 - Workshop: Housing, health and the Aboriginal Peoples of Canada
 - Presentations:
 - Radon and lung cancer
 - Addressing health inequities and the social determinants of health in environmental health practice: Findings of a pilot study

➔ **Follow NCCEH on LinkedIn and Twitter @NCCEH**

From the NCC for Methods and Tools – visit NCCMT.CA

- *Evidence-Informed decision-making in public health in action* – find it in the March 2015 edition of the Environmental Health Review journal
 - The *Learning Centre* - a suite of learning modules that have been approved for credit in the CIPHI Continuing Professional Competency program
 - The *Understanding Research Evidence* video series – find it in the “Multimedia” section of the website
- ➔ Follow NCCMT on YouTube, LinkedIn, and Twitter @NCCMT

From the NCC for Determinants of Health – visit NCCDH.CA

- *Equity in Environmental Health Practice: Findings of a Pilot Study* – find this document, produced in collaboration with the NCCEH, in the “Resource Library” section of the website
 - The *Let’s Talk* series – a collection of resources designed to promote discussion and understanding of how key concepts in health equity apply in public health practice in the “Learn” section of the website
 - *Vancouver Coastal Health – Tobacco reduction program* - a short case description that demonstrates the application of targeting within universalism to achieve greater equity
- ➔ Follow NCCDH on YouTube, LinkedIn, and Twitter @NCCDH_CCNDS

From the NCC for Aboriginal Health – visit NCCAHCNSA.CA

- *Aboriginal environmental health issues: Researchers’ and decision makers’ perceptions of knowledge transfer and exchange processes*
 - *Pathways to improving well-being for Indigenous Peoples: How living conditions decide health*
 - *Aboriginal racism in Canada*, a series of three fact sheets focused on racism experienced by Aboriginal peoples in Canada
- ➔ Follow NCCAHCNSA on Facebook, Google +, LinkedIn, Vimeo, and Twitter @NCCAHCNSA

From the NCC for Infectious Diseases – visit NCCID.CA

- The “Antimicrobial resistance” section of the website links to useful resources, including videos on antibiotic resistance produced by veterinary students
- ➔ Follow NCCID on YouTube, LinkedIn, and Twitter @CentreInfection

From the NCC for Healthy Public Policy – visit NCCHPP.CA

- In the “Built Environment” section of the website - *Registry of Recommendations that Foster Safe and Active Transport*
 - *Introduction to Public Health Ethics 3: Frameworks for Public Health Ethics*
- ➔ Follow NCCHPP on LinkedIn and Twitter @NCCHPP
